Power Electronic Devices and Components PEDC

[<https://www2.cloud.editorialmanager.com/ped-c/default2.aspx>](https://www2.cloud.editorialmanager.com/ped-c/default2.aspx)

- This year the ISSE has stipulated an agreement with the young Elsevier Journal Power Electronic Devices and Components (PEDC).
- After successful presentation at the ISSE conference authors will have the possibility of submitting an extended version of their paper with essentially new content (similarity with original conference paper not more than 15%) in a **special issue of PEDC**. After review and upon acceptance, the extended paper will be published on PEDC, giving high visibility to the related results.
- Power Electronic Devices and Components is a new gold open access journal, therefore contributing to this special issue will be an opportunity for you to play a leading role in defining the scope and development of this new title. We believe that the ISSE special issue will be an outstanding contribution to our community's understanding of the topic.
- Note that **open access fees** will be **reduced to 50% for ISSE authors**.
