Guidelines

Interested authors are requested to submit a two-page abstract according to the template (ISSE2027_P-O_Abstract_X_AuthorSurname.docx) in MS-Word document or as LibreOffice Writer document (saved as .docx-file), and as a PDF document.

Please note, electronic submission only!

Submit abstracts at: *https://cmt3.research.microsoft.com/ISSE2027*

Please be sure your abstract matches the following requirements and recommendations:

Abstract title

- A concise title without subject-specific abbreviations should be chosen.
- Author listing (principal author first)
- Complete first name (not abbreviated), surname (family), affiliations, mailing address, telephone, and e-mail address. Please indicate who intends to present the paper at the conference and who the corresponding author is.

Presentation

Indicate which session topic your paper matches and whether you prefer to do an oral or a poster presentation. **Important:** This decision is not subject to the quality of the contribution. Therefore, the same high-quality level is expected for both oral and poster paper types. Since the conference will have no parallel oral sessions, the regular contribution is a poster paper. Scientific discussions with technical depth are most fruitful in small groups next to your poster. However, some papers that address a broader auditory will be selected for the oral sessions. Choosing the final presentation mode for a paper is at the Technical Program Committee's discretion.

Abstract text

The peculiarities of the work should clearly be stated (e.g., by referring to work that has already been done). Only original material should be submitted, and abstracts should contain enough detail to clearly convey the research's approach and results. The presentation and publishing of papers require company clearance. Commercial papers containing product information without research results are inappropriate for the ISSE Conference. Let proofread your abstract to at least one colleague unfamiliar with the subject of your work. Use spell-checking aids and check your paper for linguistic weaknesses (e.g., by proofreading from someone whose native language is English).

Keywords

List a maximum of five keywords.

Peer abstract review

Paper abstracts will be peer-reviewed for technical merit, content, and clarity by an internationally composed Reviewer Committee under the leadership of the Conference Chair. Authors of accepted abstracts (Notification of acceptance: February 2027) will be invited to submit a full-length conference paper according to the conference paper template. Particularly interesting for young scientists: in contrast to other technical conferences within ISSE, this notification may contain valuable comments to support authors in writing high-quality papers. Addressing the reviewers' comments in the full paper will be checked before publication. The accepted full-length papers will be compiled into Conference Proceedings, available on a memory stick at the conference desk or online.

Preconditions for publishing in IEEE Xplore

- Authors present their papers at the conference in the form of a 15-minute speech in case of an oral presentation or a 3-minute presentation in addition to their personal poster presentation. One author may present more than one paper. However, publishing a paper without having presented it will not be possible.
- Authors confirm the originality of their papers by submitting a signed IEEE copyright form.
- Papers have been written following the guidelines provided in the ISSE paper template.
- The content of the paper suits the scope of IEEE Electronics Packaging Society (EPS).
- Papers will be checked for technical merit (e.g., whether reviewers' comments to the abstract have been considered) and will undergo the IEEE CrossCheck automated plagiarism detection and prevention software.

Only papers with EPS-compliant contents are allowed to be forwarded to IEEE for publication on Xplore after the conference. The decision on acceptance is at IEEE's discretion.
